

INDIVIDUAL ASSESSMENT PROJECT BRIEF

Campus Group Onboarding — Developer Skills Evaluation

Candidate Name	Archisman Chakraborty	Project #	19 — Pet Adoption Portal
Email ID	archisman.chakraborty@npstx.com	Duration	2 working days
Track	Flutter / React / NestJS / Spring Boot (circle one)	Due By	[Date, Time]

Objective

Build a small, self-contained application that manages the entities below. This evaluates your ability to design a clean data model, implement CRUD operations, apply validation, and handle a realistic edge case independently.

Project: Pet Adoption Portal

Parent entity: Pet — name, species, age, status

Child entity: AdoptionRequest — applicantName, requestDate, status, pet reference

Edge case to handle: Approval workflow; prevent adopting a pet that is already adopted

Core Requirements

- Full CRUD (Create, Read, Update, Delete) on both entities
- One listing view/endpoint showing child records for a given parent (e.g. GET /parents/:id/children)
- Field validation — required fields, correct types/formats, sensible constraints
- Handle the edge case above explicitly (not just happy-path CRUD)
- Clear error handling — distinguish bad input vs. not-found vs. server error
- Pagination or filtering on at least one list view
- A README with setup steps and how to run/test the project

Stretch Goals (Optional)

- Authentication on write operations
- Unit tests for core business logic
- Basic responsive/clean UI polish (frontend/mobile tracks) or Dockerfile (backend tracks)

Submission

- Push code to a Git repository (not a zip file) — commit incrementally, not one final dump
- Share the repo link to your reporting manager by the due date and time listed above
- Be ready for a 10–15 minute walkthrough where you explain and demo your own code

Evaluation Criteria

Criteria	Weight
Correctness — CRUD works, edge case handled	30%
Code quality — structure, naming, separation of concerns	25%
Validation & error handling	20%
Git hygiene — commit history, README	10%
Walkthrough — clarity, ownership of the code	15%
